for the home and trade professional

the perfect protection...

read our interview with Nick from Rushmoor 100, where we discuss how he uses our decorators varnish to protect his clients' homes

tough love

time for some heavy duty action

an exclusive range of high performance finishes from the varnish experts

varnishes | paints and metallics | decorative effects | exterior wood | brushes and tools

3 high performance finishes

gloss

Give your project a glossy glow, with our ultra shiny gloss finish.

satin

If you're looking for a subtle sheen, then our satin finish is the one for you. Look for the satin finish across the Polyvine range for a beautiful soft finish.

dead flat

We are very proud of the Polyvine Dead Flat finish. The completely non-reflective, matt surface is available across a number of our varnish products.

polyvine.com

the varnish experts

from a soft touch desk top, to a high gloss wooden kitchen, from a satin finish on an upcycled bedside table, to a dead flat finish for the newly painted or papered wall, we have the varnish for you

gloss
satin
dead flat

There are areas of our homes that we always take for granted. Endless traipsing up and down a hallway floor leads to permanent wear and tear, streams of sunlight coming through the window lead to fading wall colour, and piles of dishes, lunchboxes and coffee cups means for a worn wooden worktop.

Even the kitchen cupboards need extra care and attention, being exposed to temperature variations, sun rays, grubby hands and kitchen grease.

Polyvine have a range of varnishes that will protect these areas, as well as enhance their natural beauty.

decorators varnish

our hero product

decorators varnish, our hero product, can be used on a variety of indoor and outdoor surfaces, protecting against natural wear and tear and colour fading

protection for projects... indoors and out

- high UV resistance
- water resistant
- perfect protection for wallpaper and emulsion paint

walls

It gives great protection to emulsion paint and decorative finishes - after days of preparation and painting, apply decorators varnish to give long lasting protection.

wallpaper

Designed to completely protect wallpaper from colour fading, it is also water resistant.

By using the dead flat finish, which is completely matte, it is pretty much invisible over wallpaper.

furniture

Use on painted and natural wooden furniture, it protects against scuffing, finger marks and colour fading.

murals

Decorators varnish has been used on interior and exterior murals worldwide, to prevent fading from UV and protect the original artwork.

interview with Nick from Rushmoor Painting and Decorating

Nick is a professional painter and decorator who runs his company Rushmoor 100. He has been using Polyvine for years, and talks to us about the importance of using a high quality finish.

Tell us a little bit about yourself - I'm Nick Sammut and I'm the owner of Rushmoor Painting and Decorating. We work in Surrey, Hampshire and Berkshire.

How long have you been using Polyvine? - About 4-5 years.

How did you find out about us? - I first saw the Polyvine products on the shelf in my local Cane Adams paint store. Long before I'd ever actually used them.

Which are your favourite Polyvine products? - Decorators varnish, especially the dead flat.

Tell us how you use decorators varnish - I really use it as protection on wallpapers and bold feature wall colours.

How does it help you protect wallpaper or emulsion? - For wallpapers it adds an extra layer of durability/wipeability without impacting the overall look. For bold feature walls it does the same but also stops the paint from leaving chalky looking fingerprint marks, which even happens with durable flat matt emulsions, it's the nature of dark colours. Applying a few coats of the dead flat varnish stops that from happening. If using emulsion on skirting boards, finishing them off with the Polyvine varnish will give them more durability. Some people like the full matt look running from walls to woodwork.

It also dries super quick so applying multiple coats isn't a really long process.

Would you recommend it to others? - Of course I would... go and buy some!

time for some tough love with the heavy duty range

hardwearing surfaces, ultra-tough protection, cures in 16 hours

extreme protection outdoors and indoors

indoors

For protection in extreme conditions, use the ultra-tough Heavy Duty Extreme Varnish. It offers UV protection, and is completely waterproof, dries in minutes and cures in 16 hours, so come rain or shine you can offer complete protection to your interior or exterior projects.

satin
dead flat

floors

Keep beautiful interior flooring pristine and protected, even in the most high-traffic areas. Our Heavy Duty Floor Varnish is an ultra-hard, high quality coating with a satin or dead flat finish that offers ultra-tough protection against scuffing and scrapes. It is perfect for the home or a business or commercial property.

satin
dead flat

protecting wooden surfaces

Protect interior wooden surfaces with our highly durable Heavy Duty Wood Varnish. With satin and dead flat finishes available, this ultra-tough varnish is highly stain and chemical resistant, protecting against cleaning agents, alcohol and oils. Perfect for high wear areas with a risk of surface contamination.

“I use Heavy Duty Extreme for all my commercial customers like restaurants as it gives that toughness and clarity for high traffic areas”

Zoe Pocock,
Muck 'n' Brass

heavy duty kitchen revamp

putting polyvine into practice

When Jack Gordon Decorating were approached by a new client who wanted to repair and freshen up this kitchen worktop, they knew Polyvine's Heavy Duty range was the perfect 'go to' product for ultra-tough protection.

Photos courtesy of Jack Gordon Decorating

The original worktop was in quite a bad state, so they started with a coarse sandpaper in the Rotex sander to get the worst parts out, and then working down through coarses to finish it with a really fine sandpaper to prepare it for its first coat of varnish.

They then dusted it off, and did an all over check to ensure it was even and smooth, and then vacuumed the top and finished with a tack cloth to make sure it was completely dust free.

They applied two coats of Heavy Duty Extreme Varnish in clear satin, making sure to adhere to the appropriate drying times between coats, and sanding in between, to waterproof the surface and offer protection against UV rays. The worktop was then given a final coat of varnish in clear dead flat, to give a shine free finish to this beautiful kitchen worktop.

You can follow Jack Gordon Decorating on Instagram @jgdecorating

outdoor living

Whatever the time of year, making sure your outdoor wood and furniture is protected from the extremities is essential.

Our Exterior Wood Varnish is suitable for exterior softwood and most hardwood timber applications, giving a high level of UV resistance, waterproofing and preservation.

Remember to apply three coats of satin to ensure a highly durable finish and guaranteed UV protection, and finish with one coat of dead flat, for a completely matt finish.

given 9/10 in the Trade Decorator product review, by professional decorator, Gary Marsh

wood dye

Our Wood Dye is specially formulated to avoid unsightly overlap marks, giving an even, lustrous finish. Polyvine Wood Dye, for interior or exterior use, is intermixable giving a limitless range of possibilities to colour and enrich, stain and seal your wood. Stain the wood in the colour of your choice, and when complete, protect your project with a clear varnish from the Polyvine range.

naturally... we care

as a company, polyvine is working towards minimising our impact on the environment by reducing the carbon footprint of the business, reducing energy consumption, minimising the production of all types of waste through careful recycling, encouraging reuse, and the disposal of other waste that cannot be avoided, in a responsible manner.

- manufactured in the UK** - low transportation miles
- solar panels** - reduces our energy consumption from the grid
- energy saving lights** - reduces our energy usage
- plastic** - all plastic packaging right down to the plastic backing from our labels is recycled
- water treatment plant** - this separates waste from water, which is returned to the sewer after equipment washed down
- cardboard** - all unused cardboard is collected and recycled
- plastic bottles** - we use recycled plastic for our recyclable bottles
- metal** - steel drums and metals are collected and sent for scrap metal recycling
- printer cartridges** - our used printer cartridges are collected and recycled
- old documents and paper** - is shredded and recycled
- our safety gloves** - for pumping material, cleaning and wash-down of equipment are reusable
- stretch wrap** - all our used wrap is recycled
- pallets** - damaged pallets are recycled

our philosophy... it's a family thing

Polyvine was started by Peter Wells in 1986, and to this day, three generations of the Wells family work at the offices and factory site in Cheddar.

Now Technical Director, Peter works directly alongside his grandson Joe in the laboratory, sharing his years of knowledge and passing on his wealth of experience while his granddaughter Beth takes care of things in the sales office.

Ian Wells, MD, heads up the company, running the day to day operations and sales, with his wife and children working in various areas of the business. Even extended family members are part of the team, so family really is at the core of Polyvine's values.

Polyvine is a business whose bloodline runs with trust, integrity and hard work - an essential mix of values for any successful business.

welcome to polyvine

from Ian Wells
Managing Director

I am extremely lucky to be heading up Polyvine and I am very proud of the team and brand we have grown over the years.

Here at Polyvine, we have a strong reputation among trade professionals for innovative and high-performing products, which are designed for maximum performance and ease of use. In fact you will find that our products are easy to apply and provide the type of features that trade professionals demand and are popular with discerning DIY users too.

Polyvine products are available from good decorators' merchants throughout the UK, and can also be found internationally.

Visit our website to see our complete range of products, find out more about their unique properties, download technical data sheets and watch our 'how to' videos.

You can also use our handy stockist locator to find a Polyvine store near you and our welcoming customer service and sales team are always happy to help.

Thank you for your time and if you're not already, we hope you'll become a valued customer.

the varnish experts

Polyvine varnishes are easy to apply and have all the features that trade professionals demand from spirit based varnishes with their high grade finishes and all the advantages of water based polymers including much **shorter drying and curing times**.

Polyvine's heavy duty varnishes are the ultimate in modern, cross linked, water based polyurethane. These ultra-tough varnishes provide **extreme durability, high chemical resistance** and extremely **fast 16 hour curing**.

Polyvine are the specialists in the production of high performance, **dead flat** varnishes.

We produce our own matting agent which has been scientifically formulated to work with our varnishes to give a completely **non-reflective, smoother, flatter finish**.

We offer high performance decorating products and top quality service to our stockists and trade professionals.

All our varnishes are **developed and manufactured in the UK**.

MANUFACTURED IN THE UK BY POLYVINE

decorators varnish interior and exterior

A revolutionary water based varnish for the protection of a wide range of decorative surfaces - for paintwork, wallpaper, fabric, wood and plaster work.
